

Krishnan Suthanthiran, President & Founder of TeamBest Companies & Best Cure Foundation, is launching plan for “Best Healthcare Uberization” at Press Meet in Chennai, Tamil Nadu, India on November 2, 2018

PRESS RELEASE • Washington, DC, USA – 6:00 PM (GMT-4:00) November 1, 2018

PRESS RELEASE • Chennai, Tamil Nadu, India – 3:30 AM (GMT+5:30) November 2, 2018

All media outlets are cordially invited to a PRESS MEET at the Le Royal Meridien Hotel in Chennai, Tamil Nadu, India at 3:30 pm (GMT+5:30) on Friday, November 2nd, in the Lotus Hall, one level below the Lobby of the Hotel.

TeamBest Companies and Best Cure Foundation (BCF) are launching “Best Healthcare Uberization” (similar to Uber’s efforts to create a Global Taxi Hailing Business). TeamBest and BCF have signed a MOU with the Government of Russia on September 25th, 2018, in Moscow to accomplish this all across Russia by the end of this decade. Their aim is to lower the cost of Healthcare by 30% or more and improve the Clinical Outcome significantly, thereby reducing the Death and Suffering from Cancer, Cardiac and other Diseases by 50% or more by the end of the next Decade, in addition to manufacturing at least 50% of all Medical Technologies and Products in Russia during this time.

BCF and TeamBest Companies plan to establish similar activities and goals for India, using a Hub-and-Spoke Model of Best Healthcare Delivery System – with Express and Mobile Clinics linked to General and Super-Specialty Medical Centers, including Comprehensive Cancer Centers with the Best Optimal Technologies, including the most advanced medical technologies. These will have at least One Thousand (1000) General and Super-Specialty Medical Centers, including Comprehensive Cancer Centers by the end of next decade.

Refreshments of Coffee, Tea and Bottled Water will be provided. Light meals will be offered during the Press Meet – Uppuma (made from Samba Rava), Sambar, Chutney, Medhu Vada, Masala/Dhal Vada/Bajia (eggplant and green banana slices) and Raita.

Please RSVP by email to krish@teambest.com.

ABOUT KRISHNAN SUTHANTHIRAN:

Krishnan Suthanthiran traveled to Canada from India in September 1969 after graduating with a Bachelor's Degree in Mechanical Engineering from University of Madras, India, to pursue his Master's Degree in Mechanical Engineering at Carleton University in Ottawa, Ontario. He arrived with a total of 400 Canadian Dollars. He has founded and invested hundreds of millions of US dollars globally during the past 40+ years, in medical products manufacturing, healthcare delivery, real estate, entertainment, and energy companies. His family of medical companies is known collectively as TeamBest. He wishes to give back to Tamil Nadu by contributing in healthcare and education sectors.

ABOUT KRISHNAN SUTHANTHIRAN

Founder and President of TeamBest Companies, Best Cure Foundation, and Kitsault Energy

Krishnan Suthanthiran traveled to Canada from India in September 1969 after graduating with a Bachelor's Degree in Mechanical Engineering from University of Madras, India, to pursue his Master's Degree in Mechanical Engineering at Carleton University in Ottawa, Ontario. He arrived with a total of 400 Canadian Dollars. Subsequently, he received a National Research Council of Canada Research Assistantship which helped him to meet his financial needs. All of his college education was financed using his merit scholarship and Research Assistantship. He graduated with a Master's Degree in Mechanical Engineering in 1971 from Carleton University. He moved to the United States in 1972 and worked as an Engineer Physicist at Howard University Hospital in Washington, DC, USA until 1978.

He has founded and invested hundreds of millions of US dollars globally during the past 40 years, in medical products manufacturing, healthcare delivery, real estate, entertainment, and energy companies. His family of medical companies is known collectively as TeamBest. He founded and supports a few non-profit charitable organizations to make quality education and healthcare affordable and accessible globally. He has contributed substantially to setting up endowed chair and endowments for scholarships at various universities. He has provided significant funding to support medical research and treatment by partnering with academic institutions, national labs, and hospitals around the world.

Having lost his father to cancer while he was an undergraduate student in engineering, he has dedicated his career to cancer research and treatment. TeamBest products are used to treat millions of cancer patients globally. On April 29th 2015, in memory of his father and the millions of people affected by cancer, he launched his career-long goal of a 'Global War on Cancer' (see press release: <https://www.prbuzz.com/health-a-fitness/310650-global-war-on-cancer-launched-by-best-cure-foundation-and-teambest-companies.html>) promoting Proactive Healthcare Delivery Systems worldwide, which are focused on transparency of clinical benefits, outcome, and cost. Using a Total Health Approach through prevention, early detection, and effective treatment, improvement of clinical outcomes are possible at a significantly lower cost. TeamBest and Best Cure Foundation (BCF) are planning to create a global standard of healthcare delivery system using a hub-and-spoke model, with express and mobile clinics linked to general medical centers and super specialty medical centers. Best Cure Foundation is also working towards providing purified drinking water and affordable sewer systems in every part of the world, by the end of the next decade.

He has established a division under BCF called "3E – Education, Empowerment and Equality" to promote the development and advancement of women. It is his belief that every man and woman was given birth to, nursed, and nourished by women, and therefore, they share a greater responsibility in juggling career and family, in raising children and caring for the home. In memory of his mother, Krish is proud to support women around the world in pursuing their goals through the 3E organization.

He is planning to establish a multi-phased energy project in the town of Kitsault, British Columbia, Canada, which he owns in its entirety, under Kitsault Energy. This project is estimated to cost \$30 to 40 Billion over 7–10 years for establishing a dedicated energy corridor from northeast British Columbia and northwest Alberta to Kitsault; an export terminal and port for shipping energy products to Asia and Latin America. Currently, Kitsault Energy is working with multiple partners who have expressed desire to invest in this project and to be part of a group of customers for the energy products.

Kitsault Energy (KE) Announces Plan to Turn Waste into Energy in India and Canada

**PRESS RELEASE • Vancouver, BC & Ottawa, ON, CANADA • Mumbai & New Delhi, INDIA
FEBRUARY 19, 2018**

Kitsault Energy (KE) is pleased to announce plans to turn waste into energy in India and Canada using a Proprietary and Patented process. The waste includes legacy waste wood from pulp and paper plants, municipal solid waste, road waste, food waste, animal manure, and invasive species such as Gando Baval in India. The process produces high-energy water-repellent solid biofuel that burns with no residual ash making it ideal for coal replacement in the steel and cement industries, who together are responsible for 10% of fossil-fuel greenhouse gas emissions worldwide. KE's process is a green solution to landfills and holding ponds that transforms the energy of decaying bio-waste into a viable coal alternative, which offsets fossil carbon dioxide, reduces methane off-gassing, and eliminates prions when used to treat animal manure. The process works especially well with high-moisture bio-waste, avoiding costly pre-drying.

Krishnan Suthanthiran, President & Founder of KE says, "Kitsault Energy invites municipalities, companies, and governments with a green vision of the future to join us. Climate change, the expected cost of carbon in tomorrow's economy, the desire to get off fossil fuels, the need to develop alternative energy sources, the ever-growing problem of landfills, and the drive for a sustainable future are all compelling reasons to join us. We offer a small step in the right direction."

Kitsault Energy was founded to develop the energy riches of the Pacific Northwest of Canada by Krishnan Suthanthiran, who also is the President and Founder of the TeamBest Companies devoted to providing affordable healthcare. Reducing pollution and developing green energy sources is part of KE's prescription for a healthy planet.

Kitsault Energy is Working to Solve the Energy Challenges of both India and Canada, including the Pollution Problems of India

**PRESS RELEASE • Vancouver, BC & Ottawa, ON, CANADA • Mumbai & New Delhi, INDIA
FEBRUARY 14, 2018**

India and Canada need each other, yet what took so long for its two Leaders to meet after being elected in 2014 and 2015?

The Prime Minister of Canada, Hon. Justin Trudeau will meet his counterpart, Indian Prime Minister Hon. Narinder Modi, over four days with a group of Canadian and Indian business leaders on February 20–23, 2018 in Mumbai and New Delhi, India.

Canada is landlocked and unable to ship and sell its energy products to any country except USA. In fact, Canada has been the second largest importer of US crude oil during the past 9 months. USA is producing as much crude oil as Saudi Arabia (10.3 million plus barrels of crude oil per day, currently) and exporting LNG, LPG, crude oil and refined petroleum products (such as diesel and gasoline) globally, including Asia.

In the meantime, most of the Canadian projects, though they have questionable economics of financial returns, have been shelved – for LNG productions, Crude Oil and Natural Gas Pipelines – thereby, no export to Asia and other countries, except the projects promoted by Kitsault Energy (www.kitsaultenergy.com).

India imports 90% of its crude oil and the majority of its natural gas, LPG and LNG annually.

Kitsault Energy is working to solve the challenges of both India and Canada by exporting a range of Canadian Energy Products (in fact, all of Canada's available for export) from a dedicated Energy Corridor, Port and Terminal from Kitsault, BC – as this is the least expensive, most environmentally sound, and with the least number of First Nations along the Pipeline Route. (KE is working with the First Nations to build their local economy, help with housing, healthcare, education, training and job creation.)

Both TransCanada and Enbridge/Spectra have secured many of the necessary approvals for a dedicated Energy Corridor of multiple pipelines from the energy-rich NE BC and NW Alberta, to or via Kitsault, to the Tidewater on the NW BC.

KE has many interested parties for Canada's energy products and investments in pipeline and other infrastructures, including production plants for methanol and LNG.

Mr. Suthanthiran has travelled to Asia several times over the past few years and is "...excited to present this solution to the Prime Ministers of Canada and India to solve both countries' energy challenges and the huge pollution problems in India."

Global War on Cancer — Launched by Best Cure Foundation and TeamBest Companies

PRESS RELEASE • WASHINGTON, DC, USA • APRIL 29, 2015

In 1965, Krishnan Suthanthiran's father was diagnosed with colon cancer while Krishnan was an undergraduate engineering student in India. For more than three years, he watched painfully as the cancer spread throughout his father's body, reducing a strong and robust man to a mere shadow of his former self. His father finally passed away in 1968, after a long and painful struggle. Witnessing the suffering he endured from cancer was the turning point that led Mr. Suthanthiran to dedicate his career to the prevention and possible cure for all types of cancer.

After graduating with a Bachelor's (India) and Master's (Canada) Degree in Mechanical Engineering, he was fortunate to be recruited in 1972 by a world-renowned oncologist in Washington, D.C., to develop devices and instrumentation for research and treatment of cancer patients.

Since then, Mr. Suthanthiran has spent more than 40 years in cancer research, treatment, and cure. He has established and acquired a number of medical companies globally, in order to collect many of the technologies needed to establish a Proactive Healthcare Delivery System, focused on transparency of clinical benefits, outcome, and cost using a Total Health Approach – Prevention, Early Detection, and Effective Treatment for Total Cure. TeamBest's products have been in use in nearly 100 countries for over 60 years for cancer treatment, and TeamBest companies continue to work with various regions throughout the world to set up comprehensive cancer management solutions. Mr. Suthanthiran states that "This has been a journey of more than half a century, and with these efforts, I am proud to say that we are ready to launch a '**Global War on Cancer**'."

While there have been many significant improvements and advancements in medical technologies, many patients around the world do not receive timely interventions or the right care. Mr. Suthanthiran firmly believes more should be done. In 2007, he formed the Best Cure Foundation to work with TeamBest companies, and other leading-edge companies and experts, to establish a Hub-and-Spoke model of healthcare delivery systems to overcome these shortcomings. Best Cure Foundation's goal is to launch a Global War on Cancer that includes express and mobile clinics linked to general and super-specialty medical centers worldwide.

Mr. Suthanthiran has interacted with those in the private sector and government agencies, in more than 20 countries over the last 18 months, in Asia, South America, the Middle East, and North America. In that time, he has stated, "It is clear that there is a groundswell of support for a better, affordable, and accessible healthcare delivery system globally."

The Best Cure Foundation invites everyone to support its efforts in launching this Global War on Cancer. For more information, please visit www.bestcure.md and www.teambest.com, or contact info@bestcure.md.

An Open Letter to President Barack Obama and the Institute of Medicine (IOM)

From Krishnan Suthanthiran, Founder and President of Best Medical International and Best Cure Foundation

PRESS RELEASE • Springfield, VA 22153 USA • October 22, 2012

Recently, I read the report from the Institute of Medicine (IOM) titled “Best Care at Lower Cost: The Path to Continuously Learning Health Care in America”, dated September 2012. In my letters to President Barack Obama and World Leaders in June 2010, I mentioned reducing our healthcare costs by 30% of our then 2.5 TRILLION USD (annually). This amounts to 750 BILLION USD of savings for the year 2009. This is exactly the amount mentioned for 2009 in the IOM report dated September 2012, that we could have saved if we have a system similar to what I have proposed. Very interesting. Please take a moment to read my letters to President Barack Obama and World Leaders dated June 2010 and compare them with the IOM report of September 2012.

I founded Best Medical International in 1977 to be the Best in the world. Having lost my father to Cancer, I have dedicated my career of 40 years to the prevention, early detection, effective treatment and total cure for Cancer, by developing and manufacturing highly innovative products and technologies. Being a leader and innovator, TeamBest® is currently bidding on multiple projects worth nearly One Billion USD worldwide. Best’s family of companies, collectively known as TeamBest® is planning an additional 600,000 square feet facility for R & D, manufacturing, sales, marketing, exporting, and to hire nearly 1,000 high tech employees over the next 5 years or sooner. TeamBest®’s products are used by nearly 10,000 Hospitals worldwide at one time or another.

My commitment, dedication and passion for improving, and reducing the cost of education and healthcare, led to the birth of Best Cure Foundation in 2007. Best Cure is a nonprofit NGO (non-governmental organization), committed to making quality education and health care affordable and accessible globally by lowering the cost as much as 30% by innovative and highly efficient PROACTIVE HEALTHCARE™ using the TOTAL HEALTH SYSTEM™ and Digital Technologies. Believing in this, I have personally provided multi-million dollars in donations and loans to Best Cure, to establish Express and Mobile Clinics, Medical Centers, and Super Specialty Medical Centers with Digital Technologies, in the USA and globally. Early this year, I purchased a hospital in Brownsville, PA.

The above summary is to give you an idea of our companies, foundation and their activities. To learn more about us you may like to visit the following websites: www.teambest.com, www.bestcure.md, www.kitsault.com.

An Open Letter to President Barack Obama

from **Krishnan Suthanthiran**

President, Best Medical International, Inc.
Founder, CURE Foundation

June 2010

Subject: **Improving U.S. Healthcare Delivery at a Lower Cost for a More Secure Future**

Dear Mr. President,

This is the first in a series of my communications with you and our fellow Americans to engage in an objective discussion about the future of our country.

During the healthcare reform debate, you stated: "In the end, that's what this debate is about – it's about the kind of country we want to be." I agree that we are at a critical point in our history. What we do to overcome America's current challenges will define our future. **In 2020, will America be a country of dreams or ghost towns?**

I am proud to be an American. As an entrepreneur and small business owner with four decades of healthcare experience, I would like to share my vision for our country and the future of our healthcare system.

The Patient Protection and Affordable Care Act is a historic landmark for U.S. healthcare, bringing a century of disappointment to an end. Providing funds for comparative effectiveness studies is one of the cornerstones of the bill. However, there remains widespread concern that implementing this bill will increase costs to the federal and state governments, thereby increasing the deficit. Small businesses are unsure of the cost of premiums and other long-term effects of the bill. We all must work together to address these issues and develop a comprehensive healthcare solution every American can support.

Mahatma Gandhi dreamed of a free India. Today, it is the world's largest democracy. President John F. Kennedy dreamed of landing a man on the moon; eight years later we took that "giant step for mankind." Reverend Martin Luther King dreamed people would one day be judged by their character rather than their color. He helped pave the way for you to be elected President of the United States.

I, too, have a dream – one shared by millions of our fellow Americans – and a plan to realize this dream of quality healthcare that is affordable and accessible to all, yet 30 percent lower in cost this decade. After all, everyone deserves the best healthcare.

I, too, have a dream – one shared by millions of our fellow Americans – and a plan to realize this dream of quality healthcare that is affordable and accessible to all, yet 30 percent lower in cost this decade. After all, everyone deserves the best healthcare.

"A healthy person has many wishes, but the sick person has only one." – Indian Proverb

Such initiatives could save as much as \$500 billion from the current annual healthcare expenditures in the U.S. of \$2.5 trillion.

My plan can save millions of lives and alleviate the suffering caused by preventable diseases. These efforts will help eliminate needless and expensive emergency room visits, hospitalization and intensive care stays. In the process, our country can save as much as \$500 billion from our current annual healthcare expenditures, now estimated to be \$2.5 trillion and growing. I recognize this is a monumental task; but we can succeed, and I believe we will.

When I graduated from high school in India, a friend's father asked me if I was going to college like his son. Before I could answer, he replied sarcastically that I couldn't go because my father was poor. Yet I graduated with bachelor's and master's degrees in engineering and am helping many achieve the same dream.

As a young engineering student, I saw my father suffer and die from cancer and decided then I wanted to work in oncology. After graduation I was fortunate to begin my career with an oncologist in Washington, DC in 1972. Five years later I opened Best Medical International and have operated the TeamBest family of companies ever since.

I named my company Best to reflect my goal of being the best. I am proud to say that we have developed a reputation for being the best and the most experienced in the business. Our products have saved millions of lives worldwide and continue to do so every day.

After four decades in healthcare, I have seen the good, the bad, and the ugly sides of medicine and health insurance. I founded CURE Foundation in 2007 to create a new paradigm and promote my plan for improving healthcare globally. Among our goals and accomplishments:

■ CURE Foundation plans to establish world-class express/mobile clinics and medical centers globally. Supported by CURE Global Purchasing Organization, utilizing CURE Global Insurance, they will be truly non-profit, non-governmental, private, self-sustaining organizations.

■ CURE Foundation will open the first of one thousand such centers in Montgomery County, Maryland by the end of this year. The center will focus on establishing a global standard of care. These centers will care for patients on an individual basis, providing the best care for their specific needs.

■ CURE centers will recruit only skilled medical professionals with integrity. Free continuing medical education and training will be offered. **Bonuses and incentives will be paid based on clinical outcome and patient satisfaction.** Hours of operation will reflect the needs of a community for each specific center. Some centers will operate for 16 hours or more per day, possibly six or seven days a week.

■ CURE centers' commitment to Proactive Healthcare™ with full transparency of benefits, clinical outcome, and cost, and the Total Health™ system of prevention, early detection, and effective treatment will open doors to a new era of affordable and accessible healthcare.

■ **Such initiatives could save as much as \$500 billion from the current annual healthcare expenditures in the U.S. of \$2.5 trillion.**

■ CURE Foundation has been working with medical centers, colleges of medicine, private and public hospitals and other organizations, providing funding to develop cost-effective technologies. We are currently working with ambassadors, health ministers, presidents and prime ministers of many countries to develop a ten-year plan to upgrade healthcare programs.

As an Independent, I have voted for candidates from both parties. I am President and sole shareholder of my companies and have no aspirations for political appointment or elected office. I am passionate about my career and believe in what I do. What excites me about my work is my ability and desire to help save lives. Often I am asked about my plans for retirement, but as long as lives are saved, I will pursue my passion and contribute to society.

Mr. President, I would like to invite you, First Lady Michelle Obama, and all our fellow Americans to join CURE Foundation's initiatives to reshape America's future for this decade and beyond. I would be honored to receive your comments/support for CURE Foundation. For more information, please visit www.cure.lu; send comments to krish@cure.lu.

Sincerely yours,

Krishnan Suthanthiran

Subject: CURE Global 2020 — Improving Healthcare Delivery at a Lower Cost

June 2010

Dear Ladies and Gentlemen,

This is the first in a series of my communications with you and our fellow citizens of the world to engage in an objective discussion about improving healthcare delivery at a lower cost. As an entrepreneur and small business owner with four decades of healthcare experience, I would like to share my vision for the future of the global healthcare system.

*“A healthy person
has many wishes,
but the sick person
has only one.”*

— Indian Proverb —

My plan can save millions of lives and alleviate the suffering caused by preventable diseases. These efforts will help eliminate needless and expensive emergency room visits, hospitalization and intensive care stays. After four decades in healthcare, I have seen the good, the bad, and the ugly sides of medicine and health insurance around the world. Government-provided healthcare in most countries has failed to keep pace with the introduction of new technologies. A private healthcare system often becomes expensive and focused on caring for the rich and privileged.

As a young engineering student, I saw my father suffer and die from cancer and decided I wanted to work in oncology. After graduation I was fortunate to begin my career with an oncologist in Washington, DC in 1972. Five years later I opened Best Medical International and have operated the TeamBest family of companies ever since. I named my company Best to reflect my goal of being the best. I am proud to say that we have developed a reputation for being the best and most experienced in the business. Our products have saved millions of lives worldwide and continue to do so every day.

Mahatma Gandhi dreamed of a free India. Today, it is the world’s largest democracy. I, too, have a dream – one shared by millions – and a plan to realize this dream of quality healthcare that is affordable and accessible to all, yet 30 percent lower in cost this decade. I believe everyone deserves the best healthcare. Only through education can we effectively eliminate poverty and promote global health, understanding, and peace.

Goals and Accomplishments

I established CURE Foundation in 2007 to create a new paradigm and promote my plan for improving healthcare globally. CURE Foundation's goal is to create private, truly non-profit, non-governmental, self-sustaining medical centers, express and mobile clinics around the world, for a global standard of care at a significantly lower cost than private for-profit centers.

CURE Foundation will focus on establishing:

- ▶ Preventive Care Specialists
- ▶ Geriatric Care Specialists
- ▶ CURE U.S. and International Health Corps
- ▶ CURE Global Insurance
- ▶ CURE Global Purchasing Organization
- ▶ CURE Global Standard of Care
- ▶ CURE Institutes in the fields of neurological sciences; breast, prostate, lung, and gynecologic cancers; diabetes; obesity; cardiac care; drug & alcohol addiction; and other diseases

CURE Foundation will, at a low cost or free of charge, address the need for:

- ▶ Purified drinking water for everyone
- ▶ Sewer systems where needed
- ▶ Dental hygiene and comprehensive dental care
- ▶ Vaccines to every child for immunizations
- ▶ HPV vaccines for teenage girls and young women
- ▶ Annual physical exams and diagnostic procedures
- ▶ Access to prescription drugs and major procedures including those for cancer, lung, heart, neurological, orthopedic, vascular and other diseases
- ▶ Optimal technology for the best clinical outcome
- ▶ Education and training for health care professionals

In addition:

- ▶ Incentives and bonuses will be paid to health care professionals based on clinical outcomes and patient satisfaction
- ▶ Digital technology, electronic data systems, telemedicine, and use of the internet for other applications will be employed as much as possible

CURE Foundation has been working with medical centers, colleges of medicine, private and public hospitals and other organizations to fund cost-effective medical technologies. We are currently working with ambassadors, health ministers, presidents and prime ministers of many countries to develop a ten-year plan to upgrade healthcare programs.

CURE centers' commitment to **Proactive Healthcare™** (full transparency of benefits, clinical outcome, and cost) and the **Total Health™** system (prevention, early detection, effective treatment, and total cure) will open doors to a new era of affordable and accessible healthcare.

I would like to invite you and our fellow citizens of the world to join CURE Foundation's initiatives to reshape the future of our healthcare delivery so that poverty, malnutrition, and contagious diseases can be eliminated and lives improved by providing superior healthcare and education at a lower cost. **For more information, please visit www.cure.lu.**

About TeamBest Companies:

The TeamBest family of companies has been proudly developing, manufacturing, and delivering reliable medical equipment and supplies for more than 40 years. TeamBest includes over a dozen companies offering complementary products and services for brachytherapy, health physics, radiation oncology, blood irradiation, vascular therapy, imaging, and medical particle acceleration. TeamBest is the single source for an expansive line of life saving medical equipment and supplies. Its trusted team is constantly expanding and innovating to provide the most reliable and cutting edge medical equipment and supplies to the global healthcare and research industries.

TeamBest started as Best Medical International, which was founded in 1977 in Springfield, Virginia, USA by Indo-American engineer Krishnan Suthanthiran. Initially, Best Medical International employed only a handful of engineers and offered one high quality product, the Iridium-192 brachytherapy seed strand. Today, TeamBest employs hundreds of talented individuals and offers thousands of products and services. TeamBest's independently owned companies are proud to be represented in North America, Europe, Latin America, Africa, the Middle East, and Asia.

TeamBest's goal is to work with medical professionals to provide the best products and services. Its mission is to uphold a reputation for excellence in the healthcare field by developing, manufacturing and delivering cost-effective, high quality products to benefit patients around the world.

About Best Cure Foundation:

Best Cure Foundation was founded in 2007 to make quality Healthcare and Education affordable and accessible.

The initial goal was to make Quality Healthcare and Education affordable and accessible globally.

Everyone deserves the Best Healthcare – Education is the most effective way to eliminate poverty and promote global peace and understanding.

Today, we spend more than 10 Trillion USD globally for Healthcare and similar amounts for Education, and both are growing at a rate of 10% a year with the growing population and inflation.

Best Cure Foundation's goals are:

1. Providing **purified drinking water** and affordable sewer systems in every part of the world by 2030.
2. Establishing a **global standard of healthcare** delivery system using a hub & spoke model with express and mobile clinics linked to general and super-specialty medical centers including 2 thru 6 Star Apartment Hotels with Nursing Stations.
3. **Reduce suffering/deaths** from major diseases such as cardiac, cancer, diabetes, etc. by 50% by the end of the next decade.
4. Promoting the **development and advancement of women** through BCF's division called **3E – Education, Empowerment and Equality**.

By partnering with TeamBest Companies, BCF has launched the “Best Healthcare Uberization”. Just as Uber has transformed the taxi business, BCF and TeamBest Companies want to transform Global Healthcare Delivery – and are calling it “Best Healthcare Uberization”.

BCF is establishing a Hub-and-Spoke Model of Healthcare Delivery System, using the Best Proactive Healthcare Delivery (Full Transparency on Clinical Outcome, Benefits and Cost), using a Best Total Health Approach of Prevention, Early Detection and Effective Treatment for Total Cure.

The current Healthcare Delivery System is based on “Fee for Service” and often varies significantly from hospital to hospital. Under the Best Healthcare Uberization, the goal is to transform this to a Clinical Outcome Based Reimbursement, so there is a Global Standard of Care with fully transparent Clinical Outcomes at a lower cost – as much as 30% lower than the current cost, with far superior Clinical Outcomes.

This will allow us to reduce the suffering and deaths from Cancer, Cardiac, Diabetes and other diseases by as much as 50% by the end of next decade.

On September 25, 2018, BCF and TeamBest Companies signed a MOU with the Russian Government to establish the Best Proactive Healthcare System using Total Health Approach in all of Russia by the end of next decade.

BCF and TeamBest Companies which will manufacture most of the technologies and products, using a Best Real Estate Investment Trust, Best Medical Capital, Best Cure Health System and Best Cure Insurance, to accomplish the “Uberization of Healthcare Delivery”.

About Krishnan Suthanthiran:

Krishnan Suthanthiran traveled to Canada from India in September 1969 after graduating with a Bachelor's Degree in Mechanical Engineering from University of Madras, India, to pursue his Master's Degree in Mechanical Engineering at Carleton University in Ottawa, Ontario. He arrived with a total of 400 Canadian Dollars.

Subsequently, he received a National Research Council of Canada Research Assistantship which helped him to meet his financial needs. All of his college education was financed using his merit scholarship and research assistantship. He graduated with a Master's Degree in Mechanical Engineering in 1971 from Carleton University. He moved to the United States in 1972 and worked as an Engineer Physicist at Howard University Hospital in Washington, DC, USA until 1978.

He has founded and invested hundreds of millions of US dollars globally during the past 40 years, in medical products manufacturing, healthcare delivery, real estate, entertainment, and energy companies. His family of medical companies is known collectively as TeamBest.

He founded and supports a few non-profit charitable organizations to make quality education and healthcare affordable and accessible globally. He has contributed substantially to setting up endowed chair and endowments for scholarships at various universities. He has provided significant funding to support medical research and treatment by partnering with academic institutions, national labs, and hospitals around the world.

Having lost his father to cancer while he was an undergraduate student in engineering, he has dedicated his career to cancer research and treatment. TeamBest products are used to treat millions of cancer patients globally. On April 29, 2015, in memory of his father and the millions of people affected by cancer, he launched his career-long goal of a 'Global War on Cancer' promoting Proactive Healthcare Delivery Systems worldwide, which are focused on transparency of clinical benefits, outcome, and cost.

Using a Total Health Approach through prevention, early detection, and effective treatment, improvement of clinical outcomes are possible at a significantly lower cost. TeamBest and Best Cure Foundation (BCF) are planning to create a global standard of healthcare delivery system using a hub-and-spoke model, with express and mobile clinics linked to general medical centers and super specialty medical centers. Best Cure Foundation is also working towards providing purified drinking water and affordable sewer systems in every part of the world, by the end of the next decade.

He has established a division under BCF called "3E – Education, Empowerment and Equality" to promote the development and advancement of women. It is his belief that every man and woman was given birth to, nursed, and nourished by women, and therefore, they share a greater responsibility in juggling career and family, in raising children and caring for the home. In memory of his mother, Krish is proud to support women around the world in pursuing their goals through the 3E organization.
